

MLBB MYTHIC 15★ CHALLENGE

FINAL RULES & REGULATIONS

1. Team-Based Challenge

The unit of competition is the **team**, not an individual player. A team may be **Solo (1)**, **Trio (3)**, or **5-Man (5)**. The team earns the main challenge reward when its ranked progression reaches Mythic 15★ or higher.

2. Official Starting Rank

The challenge begins with a new MLBB season. The team's **actual rank displayed immediately before its first Ranked match** is the official starting rank. Take a screenshot. Previous-season rank or stars—including Mythical Immortal 100★+—do not count.

3. Format Lock

Before the first Ranked match, choose exactly one format: **Solo, Trio, or 5-Man**. Once the first Ranked match begins, the format is permanently locked.

4. Party Rules

Solo: Queue alone; public teammates are allowed.

Trio: The same 2 selected teammates must be used for every Ranked match after the challenge begins. No Solo, Duo, different Trio, 4-Man, or other party combination.

5-Man: The same 4 selected teammates must be used for every Ranked match after the challenge begins. No Solo, Duo, Trio, 4-Man, or different 5-Man combination.

5. Role Rules

Solo: Declare a Primary Role and Backup Role. Priority: Primary → Backup → another reasonable role if necessary.

Trio & 5-Man: Declare **one Primary Role only**. No Backup Role. If the Primary Role is genuinely unavailable because of draft/game restrictions, another reasonable role may be used for that match. Fixed teammates must not deliberately take the challenger's Primary Role to force a role change.

6. Hero Selection

Heroes should be reasonably compatible with the declared role. Normal draft restrictions and game conditions are valid. No rigid hero list is required.

7. Match & Rank Tracking

Rank is recorded as **team progress**. In Trio and 5-Man, all members share the same Ranked result and star movement, so rank is recorded **once per team/match**, not separately for each member.

8. MVP Bonus — ■300

MVP is tracked individually. MLBB displays a Winning Team MVP and a Losing Team MVP. **Only the Winning Team MVP counts**; Losing Team MVP does not. At the end, the team member with the highest total Winning Team MVPs receives the **■300 MVP Champion Bonus**. Only valid Ranked matches during the challenge count.

9. Rewards

Mythic 15★+ team reward: ■500

Most Winning-Team MVPs: ■300

Maximum total payout: ■800

10. Account & Fair Play

One account and one locked team configuration only. No account sharing, another person playing, alternate/smurf accounts, account switching, intentional losing, feeding, throwing, AFK abuse, or matchmaking manipulation.

11. No Reset / No Do-Over

The challenge cannot be restarted because of losing streaks, poor teammates, matchmaking, poor performance, rank drops, role issues, or an unfavorable result. Accidental disconnects/crashes count if MLBB records the match. An officially cancelled or invalidated match does not count.

12. Evidence & Record Keeping

Record the starting rank screenshot, locked format, fixed teammates, team rank progression, and Winning-Team MVP results. MLBB Match History is the primary verification source; screenshots are supporting evidence and may be requested

for disputes.

13. Winning Condition

The team's first verified achievement of **Mythic 15★ or higher** before the deadline is permanent. A later rank drop does not undo a verified achievement.

14. Disputes & Penalties

Minor mistake: warning; match normally counts. **Serious violation:** affected match may be invalidated. **Cheating or deliberate manipulation:** disqualification and loss of the ■500 main challenge reward.

15. Fair Competition Principle

Unavoidable randomness—normal matchmaking, public teammates, draft restrictions, or technical problems—is part of the challenge. Deliberate exploitation of a loophole is not.

CORE VALUES

Skill • Consistency • Adaptability • Teamwork • Fair Competition

All participating teams should agree to these rules before the first Ranked match of the new season.
